

Digital Signature Validation procedure

You might receive digitally approved certificate from eDistrict with “Validity unknown” as indicated in the Image 1 or blank space in that portion. Kindly follow the following steps for getting a valid digitally signed certificate.

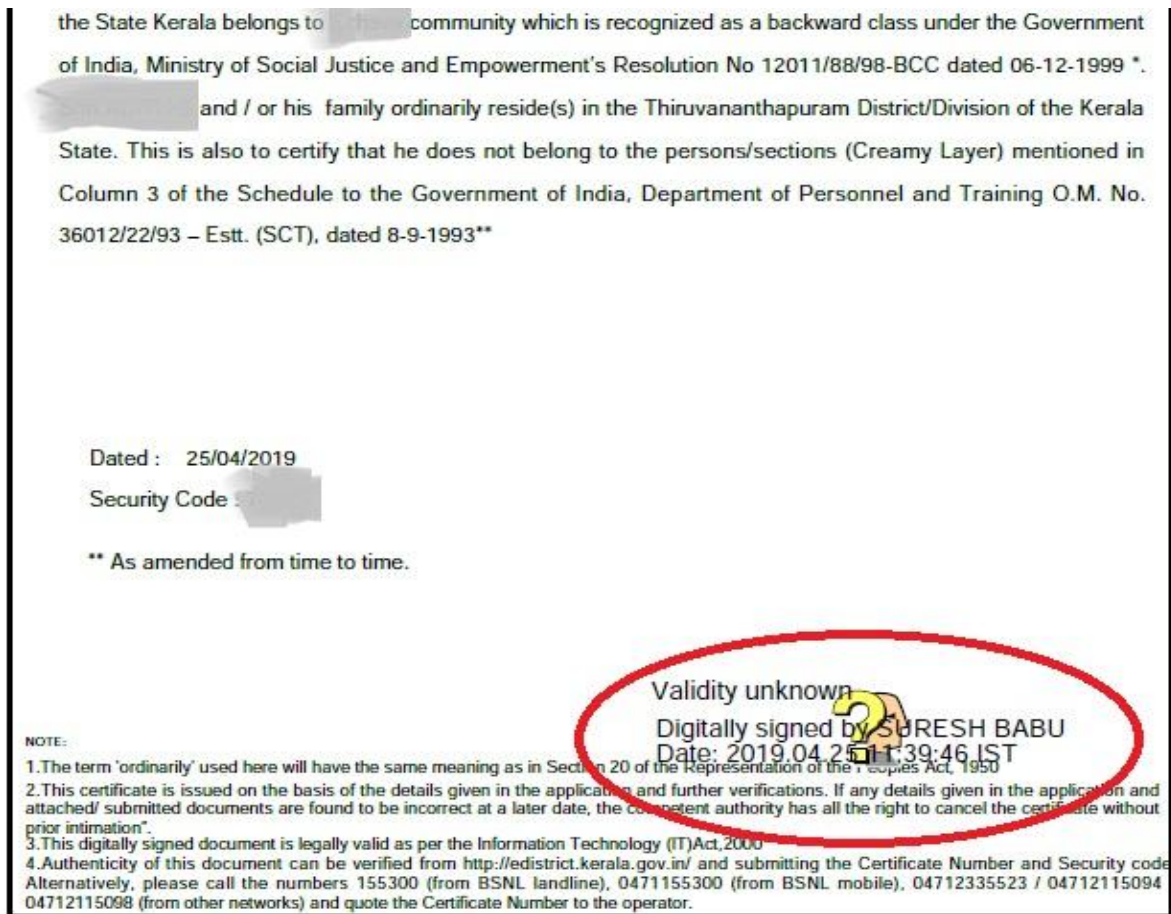

Image 1

Step 1: Install Adobe Reader 9.0 or above for viewing digital certificates, otherwise you can't view the signing details.

Step 2: Open the approved document using the installed adobe reader

Step 3: Right click on the signature portion; you can view “Show signature properties” Click on that option.
